

Jabra GN

Electronic hook switch control for Audiocodes 300 and 400 HD IP Phone Series

The Jabra Link 14201-27 EHS Adapter enables remote Electronic Hook Switch Control (EHS) with Jabra wireless headsets and AudioCodes 300 and 400 HD IP phones.

This means that users can hear ring tones, answer and end calls, adjust the volume or even mute the call up to 150 meters/450 feet away from their desks. The integration of handset and headset allows users to benefit from enhanced mobility and the ability to multitask while on a call. The wireless freedom improves work efficiency and ergonomics throughout the day.

How it works

The EHS Adapter is a plug-and-play solution that converts from the DHSG standard used in AudioCodes phones to the DHSG standard used in Jabra headsets – and vice versa.

Handset-Headset compatibility

The EHS Adapter is compatible with a wide range of AudioCodes phones. For more details see the technical specifications on page 2.

The EHS Adapter can be used with these Jabra headsets

Jabra Pro 9400 Series

First wireless office headset with user-friendly touch screen/pad for easy call control. Control calls to your desk, soft and mobile phone from the same headset!

Jabra Motion Office

First Bluetooth® office headset with user-friendly touch screen for easy call control. Control calls to your mobile, soft and desk phone from the same headset!

Jabra GN9350e/Jabra GN9330e

Dual-function (only Jabra GN9350e) headset that enables users to switch between PC-based VoIP and a desk phone.

Jabra GN9120/GN9125 Series

Award-winning wireless headset offering up to 150 meters/450 feet range, three wearing styles, conference call capability and up to 12 hours talk time.

Works with:

desk phone
